

Substance Abuse

The NPHC is concerned about the governing problem of substance abuse through the consumption of alcohol and the use of drugs, especially on college campuses. This is due to the alarming number of disastrous incidents in which alcohol and drugs play a part and the adverse health conditions caused by and relating to substance abuse.

The NPHC position is that the sale or consumption of alcohol or drugs at any NPHC council sponsored event on campus or at any student's residence or other facility is strictly prohibited.

NPHC strongly suggests that every undergraduate council offer educational programs specifically addressing the problems of and solutions to substance abuse on or around the local campus.
